

FST SERIES TRAILERS

500 | 750 | 990 GALLONS

THE TRAILER THAT GROWS WITH YOU

Your equipment is your livelihood. Protect your investment and reduce downtime with the only fluid storage and handling solution that gives you exactly what you need, when you need it.

Built to travel safely on the highway and easily navigate off-road terrain, the FST Series Trailer handles diesel, DEF and all the tools and storage you need to service machinery in the field.

Nearly every option can be added at anytime so you can start with a basic fuel set-up and adapt your trailer over its lifetime to meet your evolving needs. This includes the exclusive, closed DEF Delivery Solution that maintains the purity of DEF in off-road environments and the versatile Rear Utility Box that turns your trailer into a virtual shop on wheels. Complete your trailer with the popular WorkSight Light Tower to simplify early morning and late night refills and repairs.

Many farm operations are exempt from HAZMAT requirements (49 CFR 173.5) when operating an FST Series Trailer. For non-exempt operations, we recommend the Multi-Tank Trailer to legally mitigate the need for a HAZMAT endorsement. Contact Thunder Creek for more information.
