GENIE LIFT POWER SYSTEM

Key Features:

- Allows continuous usage for lifting, driving and powering tools, such as heavy-duty welders
- Unlike the previous system, the new system is on a stand-alone circuit with a separate hydraulic pump for continuous power
- Generator system does not require time to spool up, power is immediately available with the flip of a switch
- Increased productivity translates to no power interruptions during the welding process
- Low-maintenance hydraulic-driven generator system improves rental store's rROIC
- Three options available to provide reliable power solutions worldwide:
 - Two 3kW options are available to meet the specific demands of our global customers: For markets that use 50Hz AC power, the all-new 3kW generator can be easily configured to output either 120V and 240V single phase. For 60Hz markets, an all-new 3kW 120V generator will efficiently supply power to meet jobsite demands.
 - A single-phase, 220V (50Hz) 7kW generator solution that is specifically configured for the needs of the Australian market.
 - A three-phase, 240V (60Hz) 12kW generator solution is uniquely configured for North American boom operators to run heavy-duty weld machines.

SKYPOWER®

The JLG SkyPower® system delivers the power you need to conveniently operate other JLG accessories. With the SkyPower system on your machine, you get a 7500W generator with a power cable to the platform. Easily add and provide power to other JLG accessories, including SkyWelder® and SkyCutter® packages.

Features:

- Self-contained AC power to run hand tools
- Side-entry platform provides improved entry and allows for later quick installation of the SkyGlazier panel tray.
- Integrated power cable allows you to quickly attach or detach a variety of JLG accessories

Save Time and Money:

- Eliminate the need to move and reposition the generator, resulting in significant time savings
- Save fuel by using SkyPower in place of separate ground-based generator
- Eliminate the tracking and delivery costs associated with a separate generator
- Reduce costs associated with power cable damage
